Basic concepts of a QR code

What is a QR code generator?

A QR code generator is a tool that allows you to make your own QR codes. These codes can be customized to contain data of your choice. People can scan these codes on their smartphones and they'll be automatically sent to the content you point them to, whether it's a website, a video or a

Read more

How do I download my QR code?

You can download your QR codes at any time by logging into your account and exporting them from there. They're available in a variety of different formats including PNG, JPG, SVG and EPS. When you download them, they'll be saved in the highest resolution available.

Can anyone create a QR code?

Yes! Our tool is designed so that anyone can create a high-performing QR code with no design experience required. All it takes is a few clicks. You'll select the options you want to use and tell us what you want your QR code to do, and our QR code generator will do the rest of the work!

Read more

Why are there other websites offering QR code generators for free?

There are some free QR generators out there, but they only have limited options available and they'll often overlay their own branding on top of it. If you want access to advanced customization and analytics, you'll need a paid tool like the one we offer. With Online QR Generator, you can

Read more

Can I use the QR codes generated in the trial period for commercial purposes?

Of course! Our trial gives you access to everything a paid plan has to offer. So why not take full advantage of it and use it for your business?

What kind of information can be stored in a QR code?

QR codes can store nearly any type of digital information, including PDF files, websites, app stores, videos, and even Wi-Fi networks. With a simple scan, the possibilities of redirection are virtually limitless.

How long do I have to wait for my QR code?

We know how busy everyone is in today's day and age, so we're not going to leave you hanging. You'll be able to download your QR codes as soon as your QR code is created. You can start sharing them right away.

What's the difference between static and dynamic QR codes?

Static QR codes are the simplest kind of QR codes and they can't be modified or overwritten at any point in the future. In other words, once you have generated a static QR code, that's it - it cannot be edited. Dynamic QR codes are editable at any time. You can create a dynamic QR code,

Read more

Can I manage the codes with the QR code generator?

Absolutely! Once you have signed up for one of our plans, you can easily manage your QR codes. Our easy QR code generator allows you to create, design, save, delete, and modify your codes with ease. You can add logos, frames, colors, edit URLs, and much more. The possibilities are
